Nice Slides

Me, who else?

Some Conference, 2013-06-04

This is the first slide

So, what can we do?

We have those stupid bullet point lists, everybody has on their slides:

- Stupid
- bullet
    - point
    - bla
- lists

Fancy stuff

But there's more: There is LaTeX support: $\int \frac{x}{4}$

And of course syntax highlighting for a number of programming languages:

```
1   map((\x -> x^2), xs)
```

- One more of those

Fancy stuff

But there's more: There is LaTeX support: $\int \frac{x}{4}$

And of course syntax highlighting for a number of programming languages:

```
1  map((\x -> x^2), xs)
```

- One more of those
- bullet point lists

Another slide

Some text

Yet another slide

more text

Now that's a big slide

Big slide..

That's it, folks :)
